Mathematical extraction regression

Authored fixture. Source geometry is separate from text extraction.

Let z = a + bi, where a and b are real.

$$z\,\bar{z} = a^2 + b^2$$

Consider the sequence below.

$$x_n = \frac{1}{n + 1}$$

The displayed matrix is two by two.

$$M = \begin{bmatrix} 1 & x \\ 0 & 1 \end{bmatrix}$$
